per day

SOTI Mobile Device Management is made easy with Excel Communications. Our MDM solution simplifies security and management of your business-critical mobile devices and apps, as well as your intelligent IoT endpoints.

MANAGE MOBILE DEVICES & IOT ENDPOINTS

Remote control and view devices from 200 different manufacturers. Support the devices that best meet your cost, operating system, form factor and security requirements.

DEPLOY DEVICES QUICKLY & CORRECTLY

Get mobile setup according to company mobility policies. Full integration with Android zero-touch enrollment, Apple DEP, Samsung KME, Windows Autopilot and Zebra StageNow.

REDUCE STAFF & WORKER DOWNTIME

Use integrated productivity tools and remote support features that reduce worker downtime and keeps them focused on their work. Features such as file sync, and two-way chat, fix device and app problems quickly.

MANAGE ACCESS TO CONTENT AND APPS

Employ the complete suite of mobile content and app management tools to empower your workers. Using SOTI MDM Technology reduces the time it takes to distribute apps and data to remote mobile devices.

MINIMUM SYSTEM REQUIREMENTS

- iOS 8.0+
- Android 4.2+
- Windows CE 4.2+/Mobile 5+
- Windows XP SP2 (and above)
- macOS 10.2+
- Google Chrome or Mozilla Firefox

MANAGEMENT DEPLOYMENT & DATABASE SERVERS (for on-premises installations)

- Microsoft SQL Server 2014 (Database Only)
- Windows Server 2012 R2
- 4GB RAM
- 2GHz Dual Core or Faster
- .NET Framework 4.7 (Management and Deployment Servers Only)
- MSXML 6.0 (Required on the Deployment Server to Activate SOTI MobiControl)

Please Note:
Some requirements may differ by version of our MDM Solution.

	Multi-OS Support	<ul style="list-style-type: none"> Secure and manage your mobile devices and intelligent IoT endpoints (Android, iOS, macOS and Windows) from a single, integrated user interface.
	Rapid Deployment and Provisioning	<ul style="list-style-type: none"> Provision devices remotely using profiles and packages based on user role or geographic location. Use SOTI Stage and third-party solutions to simplify device deployment.
	App Management	<ul style="list-style-type: none"> Deliver the right app to the right employee with tight integrations with Apple VPP and Google Play. Use blacklists/whitelists to control corporate app availability.
	Content Management	<ul style="list-style-type: none"> Secure corporate files and web content with SOTI Hub and SOTI Surf. Create, edit and upload MS Office files and images. Use LDAP integration to control who sees selected files and websites on their mobile device and what they can do with them.
	Remote Support	<ul style="list-style-type: none"> Remote control devices on any HTML-5 based web browser for tablets and smartphones, even with an unreliable Internet connection.
	Device and Data Security	<ul style="list-style-type: none"> Prevent rogue apps and malware from infecting your system by controlling what can be installed on a device by using authentication, password and encryption features.
	Enterprise Integration	<ul style="list-style-type: none"> Improve the device enrollment experience for end users with SAML integration. Use LDAP or Azure AD to create policies based on corporate group membership.
	ONE Integration	<ul style="list-style-type: none"> Create incident tickets from within SOTI MobiControl. Automatically link devices to tickets in SOTI Assist. Deploy and configure SOTI Snap to Android and iOS devices.
	Simplified Android Deployment	<ul style="list-style-type: none"> Upload Android app installer files (.apk) directly into SOTI MobiControl. Support all Android Enterprise deployment configurations, including: Bring Your Own Device (BYOD), Corporately Owned, Business Only (COBO) and Choose Your Own Device (CYOD). For Corporately Owned, Personally Enabled (COPE) deployment scenarios, SOTI MobiControl v15.2 now provides additional support for Android Corporate Personal.
	Group Location Services	<ul style="list-style-type: none"> View the current location of all online devices in a device group at once. View the last known location of offline devices until they reconnect to MobiControl.
	Granular Permissions	<ul style="list-style-type: none"> Dictate which divisions in your organization have permissions (read, read/write) to users, custom data and custom attributes with greater specificity.
