

Connectivity

Business Grade Broadband

- ✓ **SoGEA:** Speeds of up to 80Mbps and can be combined with a VoIP service such as Horizon or PhoneLine+ to provide phone and broadband to your premises.
- ✓ **Full Fibre Broadband:** Speeds from 80Mbps to 100Mbps that are ideal for small and medium sized businesses and designed for modern data demands.
- ✓ **Leased Lines:** A leased line guarantees ultra-fast, symmetrical upload and download speeds up to 10Gbps with reliable uptime and resilience.
- ✓ **Starlink:** Starlink provides high-speed, low-latency internet with more than 99.9% average uptime and reliable connectivity around the globe. Expect download speeds up to 220Mbps and latency of 20ms in most places, with typical upload speeds of up to 25Mbps.

Connectivity anywhere
Satellite Broadband

Satellite internet uses powerful satellites and special equipment to provide internet almost anywhere. Because it can reach places that regular broadband can't, it's a great option for businesses in rural or remote areas that struggle to get reliable, fast internet.

Wi-Fi & CCTV Integration

Enterprise Grade Wi-Fi & CCTV

- ✓ **Enterprise-Grade UniFi Wi-Fi Infrastructure:** Latest UniFi ecosystem including U7 Wi-Fi access points for fast, reliable wireless coverage across your business.
- ✓ **Secure Network Core & Gateway Hardware:** Cloud Gateway and UniFi Dream Machine providing robust routing, firewall security, and seamless network control.
- ✓ **Centralised Software Management:** Cloud-based UniFi Controller for real-time monitoring, remote access, insights and simplified ongoing management.
- ✓ **Integrated Network & Security Stack:** UniFi switches, structured networking and scalable CCTV integration delivers single platform for connectivity and surveillance.
