Sound Professional

Build trust with a search-friendly local number, welcome greeting and branded hold message.

Local number: Trusted by Google and local customers.

Professional greetings: Record your own greeting or get a Human Voiceover recording to sound professional.

Hold calls: Place calls on hold with hold music or a custom sales message.

Manage contacts: Sync mobile, Gmail or Office 365 contacts.

Never miss a call

Handle multiple calls with queues, hold music, and divert to voicemail or other numbers if you're too busy.

Call flows: Route calls to specific numbers, extensions or teams.

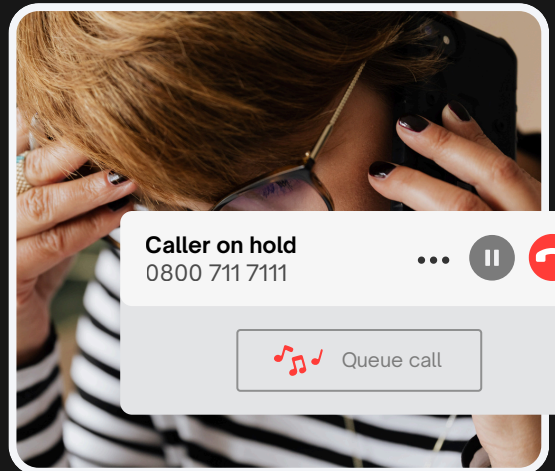

Call queues: Handle multiple calls at once.

On Hold Music: Improve hold experience with music.

Ring groups: Direct calls to ring everyone, available users or specific teams.

International calling

Work from anywhere

Enjoy superb HD-quality calls on any device in the UK or while travelling without roaming or international costs.

HD quality calls: Crystal clear calls via the nation's premium network.

iOS and Android apps: Easy to use mobile apps for your smartphone.

Flexible working: Compatible with the most popular desk phones.

International calls: Great value calls from 1p per minute.

Even More Handsets Available

We offer an even broader selection of handsets than the ones shown above, covering everything from rugged field devices to sleek smartphones for everyday business use. Whatever your industry or working environment, we can provide reliable, high-performance options to keep your teams connected and productive.

Not sure which devices are right for you? We're here to help. Our team is happy to guide you through the choices and recommend the best products and solutions to suit your specific business needs, whether you're upgrading, expanding, or starting fresh.

VoIP Software

Enterprise Calling from Anywhere

- ✓ **Big-brand reliability:** Enterprise-level phone system trusted by global companies.
- ✓ **Calls, meetings and messaging together:** Everything runs in one platform instead of separate apps.
- ✓ **Works across all devices:** Desk phones, mobiles and computers all connect to the same system.

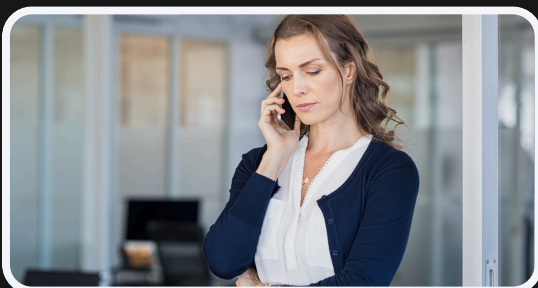

Turn Staff Mobiles into Office Phones

- ✓ **Built for flexibility:** Designed for businesses that have staff that work remotely using mobiles or desk phones.
- ✓ **Business number on your mobile:** Staff can call customers without showing their personal number.
- ✓ **Simple setup:** No complicated office phone system required.

PhoneLine+ Flexible SIP Trunks for Business

- ✓ **Upgrade your existing phone system:** Keep your current PBX but move the phone lines to the internet.
- ✓ **Flexible call capacity:** Increase or decrease the number of call channels when needed.
- ✓ **Reliable UK network:** Runs on Gamma's well-established telecoms infrastructure.

Collaboration-Focused Business Telephony

- ✓ **Designed for collaboration:** Calls, chat, video and screen sharing built into one platform.
- ✓ **See colleague availability:** Presence indicators show who is free before you transfer a call.
- ✓ **Browser-based system:** Many features work directly in a web browser without extra software.
